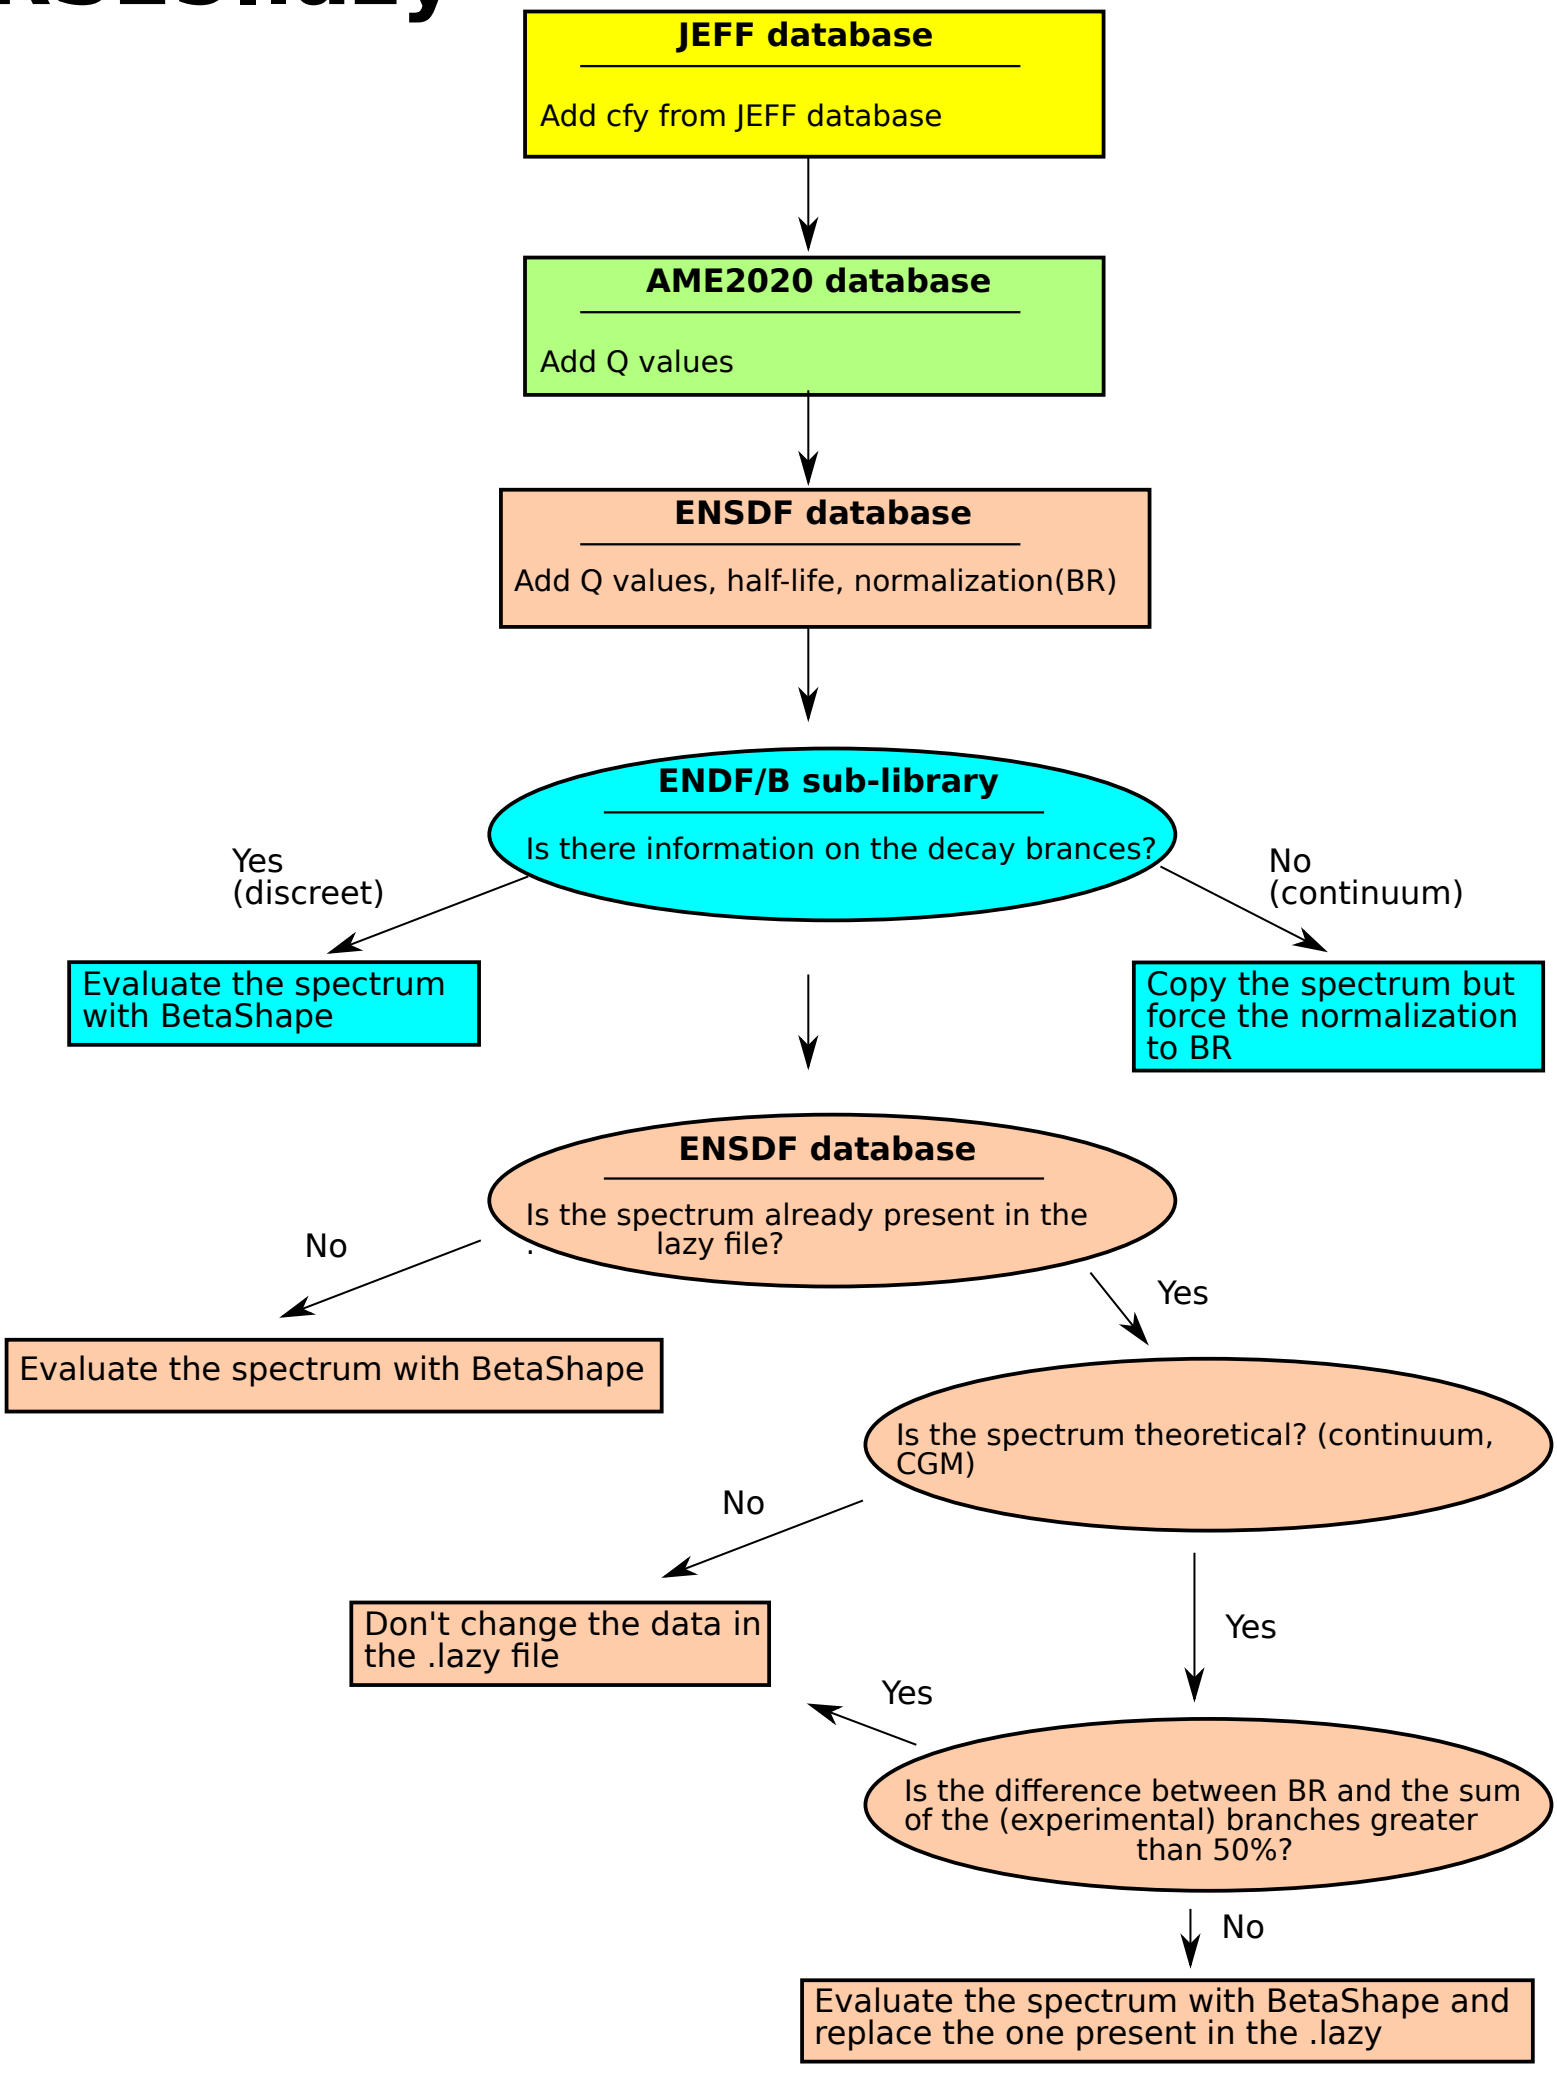
RS25.lazy



JEFF database
Add cfy from JEFF database
AME2020 database
Add Q values
ENSDF database
Add Q values, half-life, normalization(BR)
ENDF/B sub-library
Is there information on the decay brances?
Yes
(discreet)
No
(continuum)
Evaluate the spectrum with BetaShape
Copy the spectrum but force the normalization to BR
ENSDF database
Is the spectrum already present in the lazy file?
No
Yes
Evaluate the spectrum with BetaShape
Is the spectrum theoretical? (continuum, CGM)
No
Yes
Don't change the data in the .lazy file
Yes
Is the difference between BR and the sum of the (experimental) branches greater than 50%?
No
Evaluate the spectrum with BetaShape and replace the one present in the .lazy
